

**EXIN.Braindumps.EX0-116.v2014-02-21.by.Andres.47q**

Number: EX0-116  
Passing Score: 800  
Time Limit: 120 min  
File Version: 20.5

**Exam Code: EX0-116**

**Exam Name: EXIN Cloud Computing Foundation**

**Exam A****QUESTION 1**

What is a specific feature of Network Attached Storage (NAS)?

- A. NAS presents data to the user as if it is stored on a file server
- B. NAS uses the file system of the client computers.
- C. The NAS operating system does not provide security features.
- D. With NAS the file system is managed by the servers storing the data.

**Correct Answer:** A

**Section:** (none)

**Explanation**

**Explanation/Reference:**

**QUESTION 2**

What is OpenID used for?

- A. to connect to multiple web-sites without using a password
- B. to identify yourself in dealing on-line with government agencies
- C. to pay on-line via your own bank account
- D. to use one account to sign in to multiple web sites

**Correct Answer:** D

**Section:** (none)

**Explanation**

**Explanation/Reference:**

**QUESTION 3**

How can moving to Cloud computing increase user satisfaction?

- A. by accomplishing quick and efficient release of applications
- B. by increasing the access to information available on the Internet
- C. by moving internal systems with performance problems to the Cloud
- D. by passing problems with applications to the Cloud provider

**Correct Answer:** A  
**Section:** (none)  
**Explanation**

**Explanation/Reference:**

#### **QUESTION 4**

Why became the Ethernet standard popular for Local Area Networks (LANs)?

- A. because the Ethernet standard was fastest
- B. because the Ethernet standard was released for general use
- C. because the Ethernet standard was suitable for mainframes
- D. because the Ethernet standard was used by the largest vendor

**Correct Answer:** B  
**Section:** (none)  
**Explanation**

**Explanation/Reference:**

#### **QUESTION 5**

What is an example of the use of location information?

- A. to determine the user's native language
- B. to determine whether the user is connected via a mobile platform
- C. to provide advertisements for local restaurants, determined by GPS
- D. to provide the correct version of the application for the user's operating system

**Correct Answer:** C  
**Section:** (none)  
**Explanation**

**Explanation/Reference:**

#### **QUESTION 6**

What is the generally accepted communication protocol on the Internet?

- A. Net BIOS

- B. OSI
- C. SNA
- D. TCP/IP

**Correct Answer:** D  
**Section:** (none)  
**Explanation**

**Explanation/Reference:**

#### **QUESTION 7**

What is an economic cloud solution for a short term project like a one time application design?

- A. Platform-as-a-Service
- B. Software as-a-Service
- C. Communication-as-a-Service
- D. Security-as-a-Service

**Correct Answer:** B  
**Section:** (none)  
**Explanation**

**Explanation/Reference:**

#### **QUESTION 8**

What may be an economic benefit of Cloud computing?

- A. a custom accounting system
- B. acceptance by employees
- C. purchasing thin clients
- D. reduced overhead

**Correct Answer:** D  
**Section:** (none)  
**Explanation**

**Explanation/Reference:**

**QUESTION 9**

What does the integrity of information mean?

- A. It means that the access to the information is limited.
- B. It means that the information can be accessed by those users who are allowed to access it.
- C. It means that the information is accurate.
- D. It means that the information is protected.

**Correct Answer:** C

**Section:** (none)

**Explanation**

**Explanation/Reference:**

**QUESTION 10**

What is a main challenge for enterprises in using cell phones for collaboration?

- A. Applications for collaboration are limited.
- B. Collaborative applications are complicated.
- C. Employees want to use their private cell phones.
- D. Separating business data from personal data.

**Correct Answer:** D

**Section:** (none)

**Explanation**

**Explanation/Reference:**

**QUESTION 11**

What is the principal function of the Hypervisor?

- A. identity management
- B. responding to client requests
- C. scheduling the sharing of resources
- D. virus protection

**Correct Answer:** C

**Section: (none)**

**Explanation**

**Explanation/Reference:**

**QUESTION 12**

How can a protocol analyzer be used?

- A. to analyze errors in the protocol syntax used in a failed message
- B. to distribute messages according to the addressing protocol they use
- C. to measure the bandwidth required for different types of transactions
- D. to prevent virus infections in the network software

**Correct Answer: C**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

**QUESTION 13**

What is specific for public cloud?

- A. It is a client computer connected to a network.
- B. It uses both local and remote services in its implementation
- C. It uses services provided by an external service provider.
- D. The services are shared in the organization.

**Correct Answer: C**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

**QUESTION 14**

Why is a thin client called 'thin'?

- A. because it has a thin monitor

- B. because it has limited functionality
- C. because it has no memory
- D. because it has no processor

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:**

#### **QUESTION 15**

Providing a user access to an application in the Cloud requires several steps. In which step are the user's permissions determined?

- A. during the auditing phase
- B. during the authentication phase
- C. during the authorization phase
- D. during the verification phase

**Correct Answer:** C

**Section:** (none)

**Explanation**

**Explanation/Reference:**

#### **QUESTION 16**

What was a serious drawback in the early development of networks?

- A. computers being dedicated to one function
- B. computers were too complicated to be connected
- C. the low speed of the network
- D. vendors developing their own network communication protocols

**Correct Answer:** D

**Section:** (none)

**Explanation**

**Explanation/Reference:**

**QUESTION 17**

Why is text messaging in automobiles outlawed in many countries?

- A. for financial reasons
- B. for safety reasons
- C. for security reasons
- D. for synchronization reasons

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:**

**QUESTION 18**

In evaluating a Cloud service provider, which security issue is important?

- A. how the service provider implements and maintains security
- B. the compatibility of the virus scanners used by the vendor and in your organization
- C. the protection provided by your organization's firewall
- D. the security protocols used by other customers of the services

**Correct Answer:** A

**Section:** (none)

**Explanation**

**Explanation/Reference:**

**QUESTION 19**

What is the main tool for users accessing the Cloud?

- A. remote desktop
- B. the firewall
- C. the web-browser
- D. the web-server

**Correct Answer:** C

**Section: (none)**

**Explanation**

**Explanation/Reference:**

**QUESTION 20**

What is the most important feature of a virtualized environment?

- A. Multiple applications can be used by a single user.
- B. Multiple computers can be connected to a single network.
- C. Multiple operating systems can be used on a single hardware platform
- D. Multiple users can be active on a single network.

**Correct Answer: C**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

**QUESTION 21**

What is a main benefit of a Thin Client?

- A. Access to suspicious web sites can be locked.
- B. Access to web applications can easily be restricted.
- C. Users can login from any location they want.
- D. Users cannot install unauthorized or risky software.

**Correct Answer: D**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

**QUESTION 22**

What is an example of the implementation of federation?

- A. driver's license

- B. fingerprint
- C. information card
- D. iris scan

**Correct Answer:** C

**Section:** (none)

**Explanation**

**Explanation/Reference:**

#### **QUESTION 23**

Why can virus scanning software not run directly on the hypervisor?

- A. because the hypervisor is hidden software
- B. because the hypervisor only guests other operating systems
- C. because the hypervisor runs on a server
- D. because the hypervisor starts up before the virus scanning software

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:**

#### **QUESTION 24**

What is Web-based Enterprise Management (WBEM)?

- A. a management system for distributed computer environments
- B. a protocol to manage all web-based applications of an enterprise
- C. a set of management standards based on Internet standards
- D. a web-based application to manage the enterprise resources

**Correct Answer:** C

**Section:** (none)

**Explanation**

**Explanation/Reference:**

**QUESTION 25**

What is the implication on storage availability of moving to a Cloud environment?

- A. storage capability can be easily added
- B. storage capability is expensive
- C. storage capability is limited
- D. storage capability needs to be integrated

**Correct Answer:** A

**Section:** (none)

**Explanation**

**Explanation/Reference:**

**QUESTION 26**

What is the single point of truth in a Claim-based identity management solution?

- A. the cloud application
- B. the Hypervisor
- C. the identity provider
- D. the server hosting the application

**Correct Answer:** C

**Section:** (none)

**Explanation**

**Explanation/Reference:**

**QUESTION 27**

What are the functions supported by HTTP?

- A. Command Fill Add Use
- B. Get Post Put Delete
- C. Order Retrieve Send Replace
- D. Receive View Select Send

**Correct Answer:** B

**Section: (none)**  
**Explanation**

**Explanation/Reference:**

**QUESTION 28**

What is a key advantage of a content management system?

- A. It distributes content to users.
- B. It is a management system for distributed computer environments.
- C. It provides the possibility to connect to multiple web-sites without using a password.
- D. It reduces repetitive duplicate input.

**Correct Answer: D**  
**Section: (none)**  
**Explanation**

**Explanation/Reference:**

**QUESTION 29**

What is an important environment related benefit of Cloud?

- A. fewer requirements for power capabilities
- B. highly protected data
- C. independency from the Internet
- D. small bandwidth

**Correct Answer: A**  
**Section: (none)**  
**Explanation**

**Explanation/Reference:**

**QUESTION 30**

What is an important limitation of Cloud computing?

- A. actuality of data

- B. inflexibility
- C. regulatory concerns
- D. volume of waste

**Correct Answer:** C

**Section:** (none)

**Explanation**

**Explanation/Reference:**

### QUESTION 31

Which technique allows multiple operating systems to run on a single host computer?

- A. client
- B. Hypervisor
- C. sandboxing
- D. server

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:**

### QUESTION 32

What is a benefit of virtual client operating systems in protection against virus infections?

- A. A virus infection in one operating system will not infect the other operating systems.
- B. One virus scanner on a client operating system will protect all other operating systems.
- C. The client operating systems are virtual and cannot be infected from outside.
- D. The client operating systems can be protected by the virus scanner of the host operating system.

**Correct Answer:** A

**Section:** (none)

**Explanation**

**Explanation/Reference:**

**QUESTION 33**

How could presence be used to enhance security in the Cloud?

- A. by prohibiting users to access cloud applications, except when on their work place
- B. by prohibiting users to access cloud applications at their work place
- C. by restricting access to applications, depending on the user's physical location
- D. by using a web cam to identify the user of a cloud application

**Correct Answer:** C

**Section:** (none)

**Explanation**

**Explanation/Reference:**

**QUESTION 34**

Why are standards important?

- A. Standards provide interoperability.
- B. Standards provide legal compliance.
- C. Standards provide security.
- D. Standards provide the most user-friendly solution.

**Correct Answer:** A

**Section:** (none)

**Explanation**

**Explanation/Reference:**

**QUESTION 35**

What is the function of the Web Tier?

- A. load balanced databases
- B. multiple backend application servers
- C. responding to client requests
- D. supporting the client requests

**Correct Answer:** C

**Section: (none)**  
**Explanation**

**Explanation/Reference:**

**QUESTION 36**

What is the purpose of failover?

- A. to automatically restart the system in case of a failure
- B. to build up a back-up while the system is active
- C. to switch over automatically to another system
- D. to work on two systems at the same time

**Correct Answer: C**  
**Section: (none)**  
**Explanation**

**Explanation/Reference:**

**QUESTION 37**

What is a major benefit of using applications on mobile devices?

- A. Mobile devices are cheaper than personal computers.
- B. Mobile devices provide location independence.
- C. Mobile devices uniquely identify the user approaching the application
- D. Mobile devices are more secure than personal computers.

**Correct Answer: B**  
**Section: (none)**  
**Explanation**

**Explanation/Reference:**

**QUESTION 38**

What is the Pay as You Go Model?

- A. a discount for customers changing their network provider

- B. a discount for mobile connections based on the distance to the datacenter
- C. to pay for a service after ending the contract
- D. to pay for services based on their use

**Correct Answer:** D

**Section:** (none)

**Explanation**

**Explanation/Reference:**

### QUESTION 39

What is a difference between XML and HTML?

- A. XML is used to format many types of documents and structures; HTML formats the display of content in a web-browser.
- B. HTML is used to format many types of documents and structures; XML formats the display of content in a web-browser.
- C. HTML can be used to format the display of content in a web-browser, XML cannot.
- D. XML can be used to format the display of content in a web-browser, HTML cannot.

**Correct Answer:** A

**Section:** (none)

**Explanation**

**Explanation/Reference:**

### QUESTION 40

What does CaaS represent?

- A. combining applications in a single access system
- B. communication applications provided by an offsite location service provider
- C. computer maintenance services provided by an external service provider
- D. computing services provided by an offsite location service provider

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:**

**QUESTION 41**

How can moving to Cloud Computing reduce capital expenses?

- A. One can reduce the number of applications in use within the enterprise.
- B. One can reduce the number of IT staff in the datacenter.
- C. One needs less client computers to access the enterprise applications in the Cloud.
- D. One pays for the use of hardware, not for the value of the hardware at the time of purchase.

**Correct Answer:** D

**Section:** (none)

**Explanation**

**Explanation/Reference:**

**QUESTION 42**

What is the intended result of a Distributed Denial of Service (DDOS) attack on a web site?

- A. To change the content of the site to prevent it from providing further services
- B. To distribute the content of the site to users who are denied access to its service
- C. To infect the site to distribute a virus to users, which denies them access to further services
- D. To lock users out of the site by exhausting the sites resources

**Correct Answer:** D

**Section:** (none)

**Explanation**

**Explanation/Reference:**

**QUESTION 43**

What does 'loosely coupled' mean?

- A. An object implementing only a single method or function.
- B. The application from one organization can use the service of another organization.
- C. The services in the cloud can be ordered when needed.
- D. The thin clients can be disconnected anytime.

**Correct Answer:** B

**Section: (none)**  
**Explanation**

**Explanation/Reference:**

**QUESTION 44**

What is the benefit of replication of data center sites?

- A. data protection
- B. disaster recovery
- C. extended data storage
- D. increased response rate

**Correct Answer: B**  
**Section: (none)**  
**Explanation**

**Explanation/Reference:**

**QUESTION 45**

How can backups be generated without interrupting ongoing processes?

- A. by using Network Attached Storage (NAS)
- B. by using replicated data
- C. by using storage in the cloud
- D. by using storage virtualization

**Correct Answer: B**  
**Section: (none)**  
**Explanation**

**Explanation/Reference:**

**QUESTION 46**

What is one of the requirements for successfully using a Web-based application?

- A. ample client storage capacity

- B. control of user identity
- C. Service level agreements (SLAs)
- D. sufficient bandwidth

**Correct Answer:** D

**Section:** (none)

**Explanation**

**Explanation/Reference:**

#### **QUESTION 47**

Which language can be used for running programs on the client side during web access?

- A. HTML
- B. Java
- C. Javascript
- D. XML

**Correct Answer:** C

**Section:** (none)

**Explanation**

**Explanation/Reference:**

EXAM - EX0-116

Exin Cloud Computing Foundation

TOTAL QUESTIONS: 47
